SAFEGUARDING

school and university campuses

Mobiva Citizen - an intelligent solution designed to maintain a safer campus environment for students in schools, colleges, and universities.

The **Mobiva Citizen** solution serves as an easily accessible student safety platform that functions as a campus-wide emergency communication channel. By adopting this solution, school and university officials can effectively minimize risks to student safety during critical situations.

Real-time incident reporting, coupled with accurate monitoring of campus visitors, becomes crucial when lives are at stake. **Mobiva Citizen** provides a robust system for tracking and responding to potential threats promptly. With its geotagging feature, officials can stay informed about incidents as they unfold in real-time.

Campus security plays a pivotal role in ensuring the safety of everyone on campus. **Mobiva Citizen** empowers security personnel with an essential tool for maintaining a safer environment. Through detailed visitor monitoring and real-time incident tracking, school or university officials can proactively address potential security challenges.

In the realm of school safety drills and exercises, **Mobiva Citizen** offers a modern approach. By leveraging today's digitally enabled world, this solution streamlines the emergency preparedness process. Officials can now conduct safety drills with greater efficiency, providing peace of mind to students, staff, and parents during a real crisis.

By embracing **Mobiva Citizen**, schools and universities can take a proactive stance in safeguarding their communities. With its comprehensive features and user-friendly interface, this intelligent safety solution is poised to make a significant difference in ensuring a secure and nurturing learning environment for all.

01

Safeguarding

Receive instant notifications and instructions when on-campus emergencies occur and a safety personal alarm that alerts all your emergency contacts instantly.

02

People Tracking

Monitors people movement through building entries and exits, to account for missing people in times of crisis.

03

Evacuation Roll Call

Assembly and Roll Call to ensure all persons are evacuating safely from a building during an emergency.

04

Simple Installation

Connect to the internet and download. A seamless and effortless user experience that's easy to set up.

05

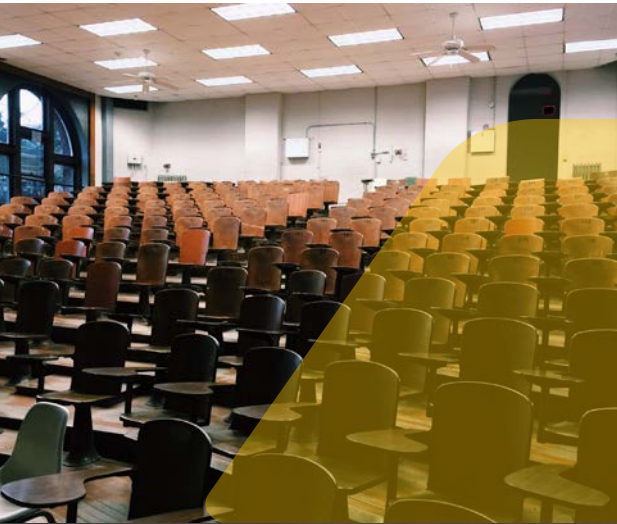

Affordable & Flexible

Flexible and modular features to support different campus needs with minimal impact on internal IT resources.

06

Incident Reporting & Response

Report a safety and security concern or incident with photos, video and voice notes discreetly.

PROBLEM

Safety and security are paramount concerns for educational institutions, especially during crises like shooters on campus, bomb threats, or fires. Traditional communication methods, such as public announcement speakers and radios, may cause delays in alerting the community.

To address this, innovative solutions like **Mobiva Citizen** offer a smarter approach. It serves as a comprehensive emergency communication channel, providing instant alerts to all stakeholders. Real-time incident reporting and geotagging technology enable swift and targeted responses by campus security. By embracing **Mobiva Citizen**, educational institutions can proactively enhance campus safety, prioritizing the well-being of their entire community during crises.

SOLUTION

Mobiva Citizen is a community-based mobile application that serves as a highly effective public emergency communication tool. It allows rapid broadcasting of critical information and serves as an alternative channel for students to request assistance when phone lines are congested during emergencies.

Lives are saved through timely coordination and collaboration.

The **Mobiva Citizen** platform is a disaster alert sharing mobile application driven by community participation. It unites multiple first responder agencies, forming a virtual cohesive emergency operations center operating on a disaster-resilient infrastructure.

Empower smarter communities through actionable data.

We unite students, first responders, and health facilities on an integrated platform to enhance community safety. By improving response times for rescue and recovery efforts, we aim to increase community resilience. Our platform facilitates timely early warning alerts, digital evacuation, digital roll call, sitrep monitoring, and automated coordination among all stakeholders in the emergency management ecosystem.

RESULTS

The solution cut emergency evacuation time by **50%** and completed roll calls in under 10 minutes. Real-time reporting significantly improved safety and reaction times during emergencies. The automation for gathering, proceeding, and exchanging information from mobile devices proved invaluable.
