PT Raksasa Laju Lintang  
(Ralali)

**Ralali**

# Building Resilient Communities Using Mobiva's AI-driven platform.

## Comments for the Judges:

"This solution's emphasis on real-time data and community collaboration showcases its inclusivity and addresses broad public safety and disaster preparedness issues effectively. "

"This solution paves the way for a future where innovative technology, active community involvement, and strategic data use transform disaster management. It demonstrates the potential of technology to create safer, more resilient communities worldwide. "

"Truly a holistic innovative proposition to address disaster management in the global scenario. Kudos to the team for creating a value proposition that is much needed for communities that are susceptible to life-altering disasters. "

# SARE Skills-Job Match for Inclusion.

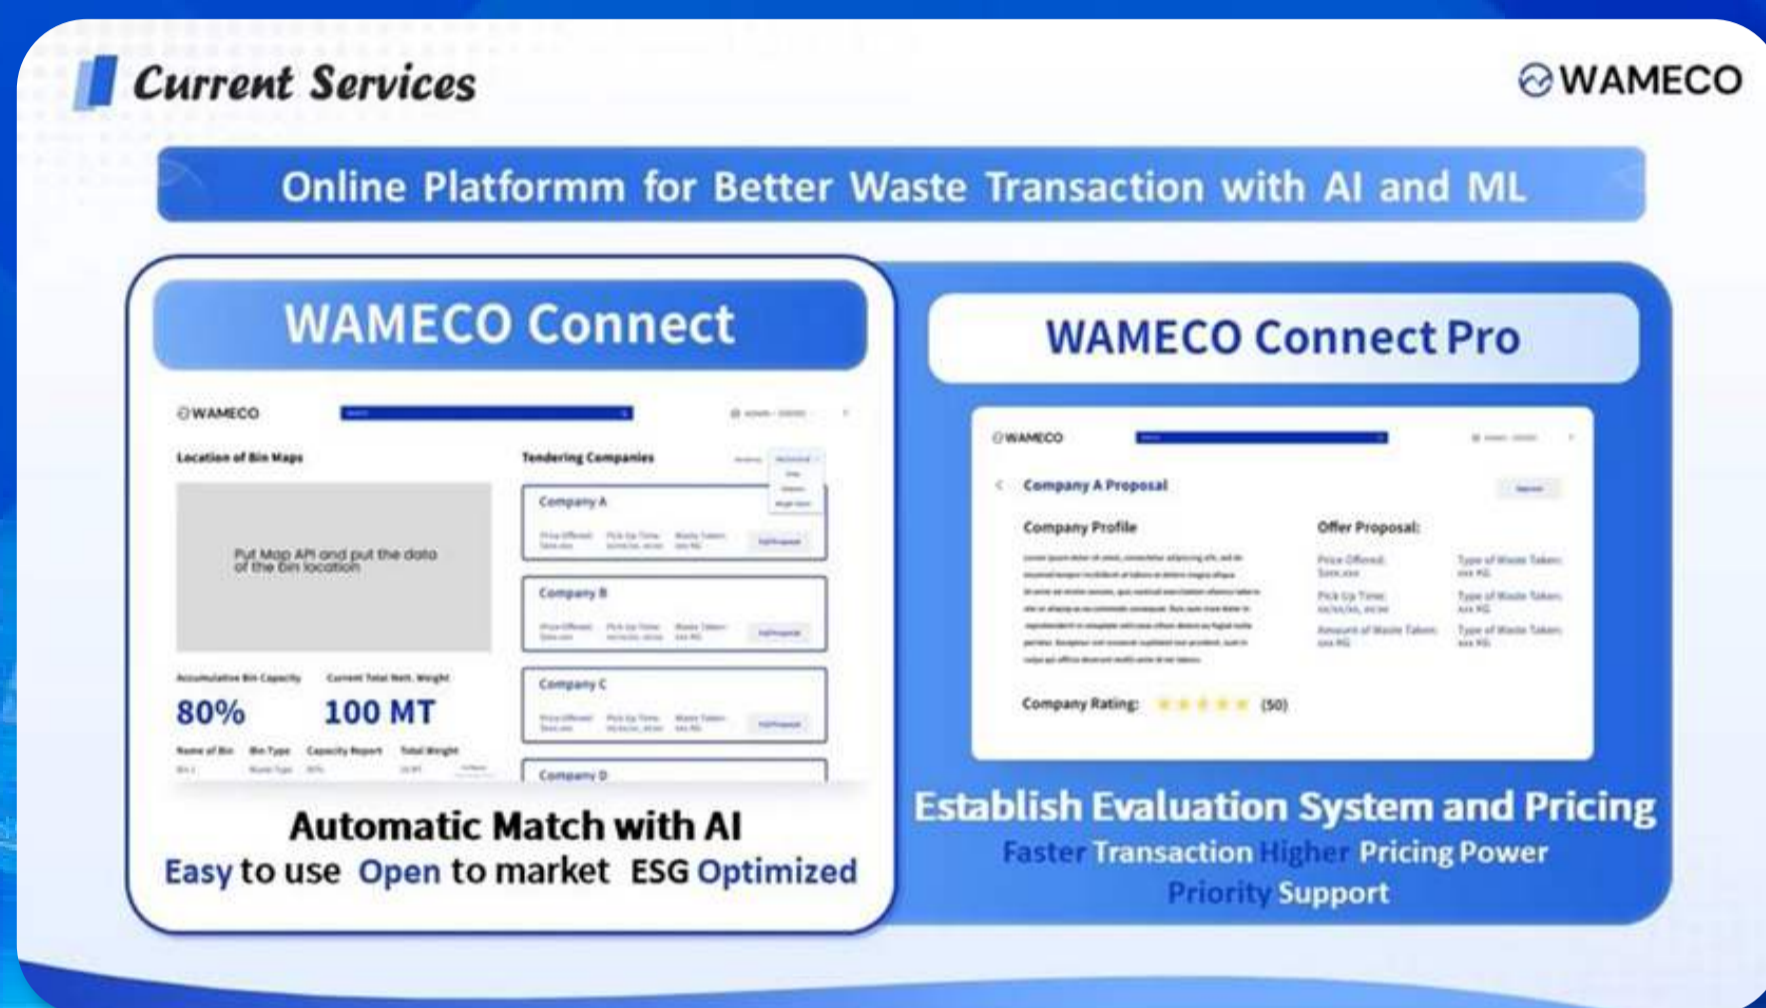

## Comments for the Judges:

"The solution is well-designed with a focus on inclusivity, affordability, and user-friendliness, offering a fresh approach to job market accessibility. "

"By leveling the playing field for underrepresented groups and democratizing opportunities, this solution not only foster individual growth but also drive progress in our communities and organizations."

"Breaking the barrier of entry to employment is an extensive challenge that is carefully addressed by this solution. With focused strategy and implementation, this innovation has the potential to benefit job-seeking people at scale.

# WAMECO - Digital waste management solutions.

## Comments for the Judges:

“This idea represents a significant advancement in waste management by integrating AI technology into a field traditionally lacking such innovation.”

“This approach not only mitigates environmental impact but also drives systemic change, ensuring long-term benefits for communities worldwide. ”

“It has the potential to do wonders in raising awareness about waste management among businesses and consumers. I believe that creating compelling incentives for businesses can help this solution thrive during execution. ”

# PT Raksasa Laju Lintang (Ralali).

## The Innovation

### Revolutionizing Food Industry With Food Technology

Transforms the food products into convenient, affordable, nutritious, and delicious meals.

**Long Shelf-Life:** >12-18 months at room temperature

**No Preservatives:** Wholesome and flavorful experience

**Nutritional Integrity:** Retain all the health benefits and nutritional value

**Ultimate Convenience:** Anytime and anywhere

## Comments for the Judges:

“Integrating modern technology to enhance preservation and address global food challenges marks a significant advancement.”

“This solution highlights the importance of leveraging technology to tackle fundamental challenges and drive positive change in the food industry!”

“Phenomenal technology to make food available and affordable to marginalized communities. Alongside empowering SMEs, the solution can reach great lengths by targeting people affected by poverty induced hunger.”

The spirit of competition  
is not about winning or losing;  
it's about the collective growth and  
the shared vision of a more inclusive  
technological landscape.
